Claim Objections

Claims 1, 3 and 5 are objected to because of the following informalities: in claim 1, next to last line "pieces" should be --piece-- because there is only one piece; claim 3, line 9, "outer" should be --an outer-- and; claim 5 is objected to because it is identical to claim 3. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Campbell (US 5,749,691). In considering the embodiment of Fig. 5, Campbell discloses a fastening device comprising a case (46) with an axial member (not labeled) inserted therein; a lock piece slidably disposed in the case to slide on tapered slide surface (not labeled) in the case towards and away from the axial member; a spring (20) to bias the lock piece towards the axial member and; a releasing member (26) connected with the lock piece to move linearly perpendicular to the axis for displacing the lock piece away from the axial member (see the right hand side of Fig. 1a). The spring forces the releasing member to move perpendicular away from the axial member.

Allowable Subject Matter

Claim 3 or 5 would be allowable once the objection(s) are overcome.

Conclusion

Applicant's remarks have been considered but, are moot in view of the new grounds of rejection.
